## Product discontinuations in the course of the MDR transition

## Dear customers,

The process of product discontinuation is an important part of WILAmed product lifecycle management, which ensures the usual high WILAmed service and support standard for our customers. As of 15.01.2024, our product groups breathing gas humidifiers, heated breathing sets and humidification chambers were produced and placed on the market in accordance with the MDR (Regulation EU 2017/745) in compliance with the latest European regulations. This will now be followed by the certification of our other product groups: unheated breathing sets/breathing tubes, respiratory masks, exhalation valves, tube extensions and the WILAflow Elite ventilator.

The following products will be discontinued with this change:
